

# STRATEGY

So far NOSA has been able to carry out a survey and prepare a report on the building as much as holding consultative meetings which have been well attended.

A number of activities have been planned to fundraise towards this event and this include:

- a) Jumbo Sale.  
Many of us have got a lot of useful things stored up in our garages, stake away boxes and stores that valuable and yet you know that you probably will never use these items. These are the kind of items we will ask you to bring as a contribution for the jumbo sale.
- b) Talent shows and hilarious day with drama group and school choir especially during visitation day.
- c) Dinner(s) here there will be some items for auctioning that day.

# NABUMALI HIGH SCHOOL CHAPEL

## The Artistic Impression of the Proposed St. Peters Chapel.

Right hand-Side view

Front view

Left hand-side view

## St. Peters chapel

The current state of the chapel

St. Peter's chapel block is located strategically on affirm volcanic gravel, near the main gate and sandwiched between the open air stage, administration block, the library and the tennis courts. i.e. .With a population of close 1200 students and staff, the needs of the school community are as diverse as the community it's self.

## Inside the chapel

Peeled off PVC Tiles along the Isle from Entrance Porch towards the Pulpit

St. Peter's chapel specifically seeks to renovate it's existing facilities with the ultimate goal of evangelizing and discipling students and staff of Nabumali high school as well as other members of the community by providing practical solutions like need for recreational space; especially during school holidays, counselling, fellowship, resource centre and meeting room during Visitation days and parent's annual general meetings.

## The architectural front view of the Chapel

Artistic impression of the proposed chapel (Front View)

Our primary objective is to provide a descent accommodation to both students and staff meetings and the community at large- especially the parent's annual general meetings and old student's general meetings. Secondly we also saw the need to redeem this historical building from collapsing. We also seek to protect our students and staff from an expected accidents due to break down of the building. Last but not least, there is also need to kick start early preparations for the century celebrations for the school.

## Progress.

Gci sheets covering the Concrete Roofs slabs over Chaplain's office, Prayer cubicle and Entrance porch.

So far, we have been able to carry out a thorough survey on the chapel with legible engineers. They have been in position to give a comprehensive report on the chapel and even quantifying the necessary needs.

## Outstanding challenges

- The walls of the building are cracking at a terrible rate and the roof is also leaking. These problem (s) need be solved as soon as possible to avoid any embarrassments.
- The need for a descent office space for the chaplain still stands.
- Whereas the chapel leaders are now accommodated in the chapel, the space is not adequate enough to cater for the increasing population. More still the need for counseling room, is high lighted now more than ever.
- Because of the indebtedness crisis in the school, the school is not in position to lend such a big hand towards the project thus, calling for total commitment into the project by all old students and well wishers.

Leakages in the Roof over Prayer cubicle resulting from moisture ingress into the slab but no major structural crack observed

Cracked wall and slab in the Chaplain's office. These sections with structural cracks shall require reconstruction.

Spalling Concrete Slab over Entrance porch. Presently covered with cgi sheets

Glass panels supported both in fixed and sliding steel frames
